25 JOULES (watt-second) and yet...
It is the most efficient strobe light available because...
It uses only the power that is normally wasted by a voltage regulator...
Unlike automobile regulators, U.L. regulators short to ground OR
dump all the current that is not used with the battery, wasting 4 to 15 amps and
that is why this strobe is so BRIGHT.

Mounting the Strobe Head is accomplished using the stainless steel mounting tab attached to the base of the head. The power supply box is equipped with two rubber coated gripper clamps with velcro safeties. These clamps will attach to 1", 1-1/8" or 1-1/4" diameter tubing. Custom mounts are available.....send us your ideas and we'll make it happen.

Note: All power supply wires are 5' Long.

Description	Part No.	Price	Buy
DUAL WINGTIP STROBE SYSTEM	10-00819	\$291.95	ADD TO CART
