

Website Wide Search Facility

The Committee is pleased to announce this major enhancement to the Club Website.

The amount of information available to Members from the website has increased enormously over the last few years, which has sometimes resulted in specific items being difficult to locate within the website. The sterling work of our USA Representative Jim Butcher in indexing the Europa Flyer and Tech Talk Index each month has gone a long way in helping members locate specific articles in these publications. The further addition of the Bud Yerly Notes under the Building Section of the Website has greatly enhanced the plethora of information available to Member. To help Members find specific items within these, and all other areas of the Website, we have introduced a global Search Facility, (only available to logged in Members) from the Home, and all other Pages on the Website. The Search Facility is located on the right hand side of any page, as seen in the examples below, highlighted in yellow

Entering a term in here, and clicking on the spyglass at the side of the box will return a list of pages containing that term, and hyper-links, to take the user direct to that page. It is also possible to use AND/OR terms within the Search Box. i.e. Monowheel AND brakes or Monowheel OR brakes to further narrow down the search criteria.

Results are listed out as hyperlinks and when you click through to a result, the search term will be highlighted in yellow.

If you have any problems, please feel free to contact me at treasurer@theeuropaclub.org
