To OP Technologies Dealers and Customers:

I am very pleased to let all of our dealers, customers and supplier chain partners know that OP Technologies, Inc. has been acquired by Aerosonic. Aerosonic is a leading manufacturer of Flight critical aircraft instruments and Angle of Attack / Stall warning systems for a variety of aircraft, from Boeing's F18 to the new Cessna Mustang. As many of you know, we have been working hard over the past year on a certified version of our displays. As we progressed down the certification path, it became clear to us that a relationship with the right partner would be a benefit to our certification effort, the customers for the certified product and our experimental products as well.

Aerosonic has a rich history of manufacturing and servicing instrumentation as well as valuable technical expertise with FAA environmental qualification testing and manufacturing issues. The combination of Aerosonic's skills in these areas and OP Technologies' glass panel product line and engineering skills made this the right relationship and now was the right time.

Many of you saw us as OP Technologies last month at Oshkosh and commented that with our integrated avionics packaged including features like the FLIR camera interface, we've come a long way in the last 5 years. Joining Aerosonic make us part of a team that will foster and grow what's been started with the Flight OP and OP Integrated EFIS products.

Our current Flight OP EFIS, OP Integrated packages and the Pegasus IAS-E products will be manufactured now as Aerosonic's Display Products Group. Aerosonic is committed to supporting and expanding the products and marketplace that has been established for our display products. Our current Q3 pricing is still in effect and you can contact Aerosonic Sales and Marketing Department at 727-461-3000 to obtain quotes and place orders in the same manner that you have been doing. There may be some increase in lead times as we transition manufacturing from Beaverton, Oregon to Clearwater, Florida, but we will work to fill orders in a timely manner with high quality. We will also be communicating with you as we firm up schedules for new products. For those dealers that are attending NBAA next month, we will be exhibiting there as a part of Aerosonic (booth #7751). We will also be attending the AOPA Expo next month but were not able to get display space there. We realize that some of you are exhibiting at that show and will be getting new brochures out to you before the show and visiting with you.

I am pleased to be a member of the Aerosonic team and in my new role at Aerosonic; I will work hard to continue to provide you with excellent display products and service. As we move forward, Mr. Tom Bates, tbates@aerosonic.com will be the primary point of contact for dealers of Aerosonic's display products. Along with the rest of the Aerosonic team I am looking forward to working with you as we grow our businesses together.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dexter Turner', written over a white background.

Dexter Turner
